Forecast for Monday 13 Jun 2022

Weather: Cloudy with rain edging in later in the night, continuing during the morning. The rain mostly light but some heavier outbreaks over mountains of Knoydart, Skye and Torridon. Drier in the afternoon and evening with brighter interludes in east of area.

Chance of cloud-free hill tops above 800m: 30% in the morning, mostly in east of area, improving 60% in afternoon.

Low cloud and visibility: Misty conditions during the morning with poor visibility in more persistent rain. Also extensive cloud cover well down the hills. Pockets of good visibility in east of area with clouds up around 700m and clouds lifting and breaking more widely during afternoon with visibility become good across many ranges away from West Coast.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Strong winds and single figure temperatures over higher ridges/summits will make it feel unseasonably cold.

Forecast for Tuesday 14 Jun 2022
Weather: Another cloudy day with outbreaks of rain and extensive hill fog. Eastern such as Ben Wyvis will have some direr, brighter interludes, extending to many ranges later in afternoon.

Maximum wind: Fresh to strong southwest winds on the tops, average speeds 20 to 30mph with gusts 40mph.

Chance of cloud-free hill tops above 800m: 30%, best in east of area.

Low cloud and visibility: Misty conditions with poor visibility in more persistent rain with clouds down about 500 to 600m and some patches lower down near to West Coast. Pockets of good visibility and higher cloud bases in east of area, extending to other areas later in afternoon.

Temperature: **Glens:** 9 Celsius rising to 16 Celsius.
At 800m: Plus 8 Celsius.
Freezing level: Above the summits.
